DETAILED ACTION

1. This supplemental Notice of Allowance supercedes the previous Notice of Allowance mailed June 12, 2006. The examiner inadvertently include "a" before "sphingosine 1-phosphate" in claim 5.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Susan J. Mack on June 5, 2006.

The application has been amended as follows:

Amendment to the Specification:

The title of the invention, "Antifibrotic agent containing sphingosine 1-phosphate receptor agonist or sphingosine 1-phosphate as active ingredient", is replaced with --Use of sphingosine 1-phosphate as active ingredient for the treatment of pulmonary fibrosis--.

Amendment to the Claim:

Claim 5. A method for treating pulmonary fibrosis, said method comprising administering to a patient in need thereof an effective amount of an antifibrotic agent consisting of a sphingosine 1-phosphate as an active ingredient and a pharmaceutically acceptable carrier to treat pulmonary fibrosis.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: US 5,712,262 (Spiegel) teaches a use of sphingosine 1-phosphate in retarding apoptosis in degenerative disease such as a ischemic stroke. US 5,627,171 (Park et al) teaches a use of sphingosine-1-phosphate/N,N,N-trimethylsphingosine composition to inhibit cell motility and cell proliferation, particularly tumor cell. US 6,098,631 (Holoshitz et al) teaches a use of inhibitor of sphingomyelin signal transduction pathway including inhibitor of sphingosine phosphate formation for the treatment of autoimmune disease, particularly rheumatoid arthritis, by inhibiting proliferation and inducing apoptosis. However, the cited reference(s) alone or in combination do/does not teach or suggest the use of said composition consisting of a sphingosine 1-phosphate and a pharmaceutical acceptable carrier in treating pulmonary fibrosis.

With respect to the term "a pharmaceutically acceptable carrier" (which was introduced by the amendment filed May 19, 2006), although there is no literal support for this terminology in the specification, the specification (page 6, line 6 thru page 7, line 27, particularly page 6, line 25 thru page 7, line 18) provides sufficient examples of pharmaceutical carriers which are suitable for the administration, for example purified water, ethanol, vegetable oil, propylene glycol, polyethylene glycol and a mixture thereof as well as microcrystalline cellulose, starch, lactose, mannitol, gelatin and etc... Thus, the examiner considers that the term "pharmaceutically acceptable carrier" finds support in the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Claim 5 is allowed.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Kwon whose telephone number is (571) 272-0581. The examiner can normally be reached Tuesday through Friday from 9:00 am to 7:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel, can be reached on (571) 272-0718. The fax number for this Group is (571) 273-8300.

Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
